September 2016 – Clumsy Ninja

Android, iOS

Company: NaturalMotion

Discipline: Programming Intern

Manager: Dan Kennedy

Clumsy Ninja is a game available for iOS and Android. It is the first game to use the company's Euphoria technology.

Job Roles:

- ❖ Implemented new tracking metrics for video ads
- ❖ Created new in-game events
- ❖ Developed tools in C# for creating events
- ❖ Overhauled the entire the debugging menu

July 2012, April 2010 – Everything's a Lie

Windows, Nintendo DS homebrew

Everything's A Lie is a puzzle-platformer where the nothing is as it seems. The game requires the players to perform actions they would otherwise not take, e.g. jump into a pit of spikes, avoid collecting coins, etc. The Windows version was released in 2012. The DS homebrew version was released in 2010.

June 2011-June 2009 – Sliker (series)

Windows, Nintendo DS homebrew

Sliker is a series of challenging bullet-hell arena shooters.

The original Sliker was released in June 2009 for Windows. It features 10 levels and a boss fight, a level editor, an online scoreboard, and supports several control schemes (including Wii Remote and DS3 controllers).

CoVS-Sliker features everything in the original as well as 4-player online and offline cooperative and competitive modes, and over 50 levels with 4 boss fights.

Sliker DS is a reimagining of the original and was released in June 2011.
